## Objective

Sustainable dividends balanced with moderate capital appreciation are the dual objectives of the Connected Canadian Dividend portfolio. This portfolio has a dividend focus and invests exclusively in Canadian listed companies.

## Investment philosophy

Dividend focused investing has become a core strategy for many Canadian investor's portfolios driven by the need for income, lower volatility and growth of capital. We believe there are secular trends that will keep this strategy delivering for investors, but it must be done right.

**Dividend Health** - Not all dividends are the same. Some companies, given their business operations are better positioned to pay dividends than others. Canadian Dividend places a strong emphasis on the quality and sustainability of dividends in the stock selection process.

**Dividend Growth** – Connected Wealth Canadian Dividend focuses on dividend sustainability and a company's ability to increase dividends over time. Avoiding chasing the highest yielding companies.

## Risk Management

As dividend paying companies tend to be concentrated in select industries, maintaining a broad diversification is a crucial component of our risk management. At the company level, we continuously monitor both fundamentals and technicals using our deterioration monitor using our deterioration monitor.
